TWO EIGHTH GRADE STUDENTS AT EASTBROOK ACADEMY PASS AP BIOLOGY EXAM

[MILWAUKEE, WI]—Hannah Hacker and Corrie Osborne, 8th grade students at Eastbrook Academy during the 2008-2009 school year, both earned passing scores on the Advanced Placement Biology exam. Their biology teacher, Joshua Beggs, routinely taught his 8th grade classes material that he had not learned until college, and he found that most of his students responded well to the challenge. Mr. Beggs is developing a track record of helping young, first-year biology students to master college-level material. During the 2007-2008 school year freshmen Paul IZard and Haley Quinn earned passing scores on the AP Biology exam. Eastbrook Academy, located at 5375 N. Green Bay Avenue, Milwaukee, WI, is a participant in the MPCP “Choice” voucher program in Milwaukee and is known for its rigorous academics and excellent test scores.
